

Three reasons to replace skylights with Skylight Systems when you re-roof.

1 Save Money and Time

During a replacement, your roofer removes the shingles around your existing skylight to re-flash and re-seal it. This makes the most ideal, cost-effective time to replace with a Skylight System when you re-roof and the old shingles are already out of the way.

2 Improved Energy Efficiency

VELUX continually develops and tests our products to ensure the highest standard of design — and the Skylight System is no exception. The System features our Standard Safety Glass along with advanced LoE glazing options to provide the best balance of daylight, protection, and heat control. Plus the included solar-powered shade can boost the entire Skylight System's energy efficiency by up to 46%!

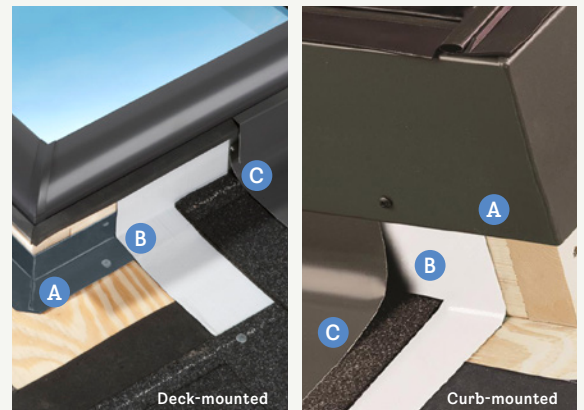

3 Coincide Warranties

The VELUX Skylight System implements our patented three layers of protection to ensure a watertight seal and give you peace of mind. Our industry-leading warranty covers your Skylight System and its installation for 10 years** and glass protection for 20 years. If you replace your skylights when you re-roof, you can coincide your Skylight System and roof warranties for better overall protection.

Three Layers of Protection

A Pre-Attached Seal

Pre-attached deck seal (deck-mounted) or gasket (curb-mounted) provides a tight seal for leak-proof installation.

B Underlayment

Adhesive underlayment provides secondary water protection against the harshest weather conditions.

C Flashing

Engineered flashing for easy installation and primary water protection.

*Up to 46% depending on skylight model and size.

**VELUX flashing required. Visit veluxusa.com/weathertight for more information.

Solar-Powered
Remote-Controlled
Shade
Pre-Installed
for Total Light &
Climate Control

Upgrade your skylights to the **Ultimate Skylight Experience.**

With The VELUX Skylight System, you get beautiful daylight and complete control over the light in your home. Available in fixed or venting models, each skylight comes with a pre-installed solar-powered shade, giving you the ability to adjust light, manage indoor temperatures, and boost energy efficiency.

46% More Energy Efficient*

Shades improve year-round comfort: **a 46% improvement in U-value** helps keep your home warmer in the winter, and lets in **43% less solar heat gain**, helping to keep your home cooler in the summer.

Comfort-Driven Light Control

Brighten a space or soften the sunlight—the included solar-powered shade in the Skylight System creates the right atmosphere any time of day.

One-Touch Operation

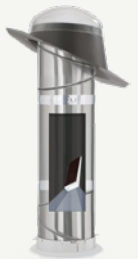

Easily adjust light and comfort from anywhere in the room with a simple, handheld remote.

VELUX SKYLIGHT SYSTEM

Skylight + Shade + Remote

Have other places in
your home that could
use more daylight?

VELUX Sun Tunnel® Skylight with Solar Night Light

Add a Sun Tunnel with Solar Night Light to your replacement project! The VELUX Sun Tunnel is a tubular skylight and economical option for adding more natural light to smaller spaces in your home.

Paired with the Solar Night Light, a Sun Tunnel lights your space with sunlight all day and a moonlike glow all night for consistent, electric-free lighting.

*Up to 46% depending on skylight model and size.
